Point, Click, Evaluate...

PowerHouse

So you think there is only one Industry Solution when it comes to Home Evaluations?

PowerSoft Development Corporation is pleased to announce the much anticipated release of our latest version of **PowerHouse**, an advanced, component based Home Evaluation Solution, which provides a comprehensive cost analysis for your clients. Already in use in over 1500 brokerage, credit union and insurance company offices, **PowerHouse** is a proven and accepted replacement cost calculator. PowerSoft offers a **Free Data Migration** from your current evaluation program with every PowerHouse purchase.

PowerHouse offers a number of features that are not available in other evaluation programs. Features such as the Data Collection Worksheet, which is printed blank, in advance of doing an evaluation, and then taken to the clients home to ensure that all of the required information is gathered to complete an evaluation. PowerHouse offers a full compliment of additional features and built-ins, and there are comprehensive fireplace and swimming pool choices to allow for the many different types of these two features that are commonly found in today's homes. From additions and basements that are finished in a different building class than the original structure, to multiple family features, like additional kitchens, separate entrances and multiple heating and electrical services, **PowerHouse** generates accurate guaranteed replacement costs.

PowerHouse pricing is based on a workstation license, starting at $300 for the first workstation, and $100 for each additional workstation. Therefore, an office requiring evaluation software for 5 workstations would cost $700 plus applicable taxes, per year. Replacement cost evaluations are only a small part of your business, and the software that provides those evaluations should only be a small expense to your business. That is why we did everything we possibly could to keep **PowerHouse** affordable.

If you would like more information regarding our Home Evaluation Software, or any other PowerSoft products, please call our sales department at **1-888-833-7697**.
