Introducing PowerQuote Enterprise Edition

with new, advanced features...

Log Home and Seasonal Dwelling evaluations are available in PowerQuote Enterprise, and the electronic format of these evaluation tools is an industry first. Following the simple format of our Residential evaluator, the Log Home and Seasonal Dwelling evaluations are accurate and easy to use.

QuoteCast gives consumers the comfort, convenience and choice of instant online quotes from your brokerage website *on their own time,* 24 hours a day, 7 days a week. QuoteCast is highly customizable, allowing you to configure it on your website however you see fit, so it looks and feels like a natural and original component of your website. It is easy to install on your website, and you can set a variety of filters to ensure you are quoting only the business you want to write.

Mid term endorsement rating allows you to make quick and easy policy changes, like adding a driver or substituting a vehicle simply by inputting the insurer, original premium amount and transaction date, and proceeding with the policy change. PowerQuote Enterprise will pro rate the premium difference for you.

Production and management reports allow you to see your office production in real time. Quotes to policies by producer, or by insurer, and various other criteria can be charted and graphed, and broken down by line of business, date, insurer or producer.

PowerQuote Enterprise Edition is available to all PowerQuote users, and can be added to a new or existing PowerQuote license for only $150/month on top of your current license fees.
