

# We offer a unique method of pricing ... Simple

## No Upfront Fees

We've made purchasing PowerQuote as easy as possible. There are **no upfront licensing fees, installation fees, integration fees, or for that matter, any upfront fees of any kind.**

## Simple Pricing

With PowerQuote, your rating software can now quote ALL of your contracted insurance markets, including group markets and substandard markets, because **our pricing is based only on the number of workstations in your office and NOT the number of markets you require or features you desire.**

For example, an office with 5 workstations requiring automobile and habitational rating, as well as the Home Evaluation option, would pay an all inclusive price of \$245.00 per month, (plus taxes and 3% finance fee) or \$2940.00 per year. (plus taxes)

## Easy Payments

We offer two methods of payment; Annual or Monthly PAP. If you choose a Pre Authorized Payment plan, you have the choice of two withdrawal dates, the 15th or the 30th, and there is a 3% financing fee.

## Multiple Offices?

### No problem

**We do not charge any additional fees for multiple offices or locations.** Since our pricing is based only on the number of workstations you require, just add the total number of workstations from each of your additional offices with the number of workstations in your main location to determine your PowerQuote licensing requirements.

## Two Versions;

### Standard or Enterprise

PowerSoft now offers 2 versions of the PowerQuote rate comparison software. The Standard Edition keeps rating and prospecting simple, while offering all the necessary tools to close a sale. Features like VIN validation, homeowners special limit comparisons, company specific underwriting logs and billing plans, PDF creation, BMS integration and integration with company web portals are included with the Standard Edition.

The Enterprise Edition is available for brokerages that require more administrative and management functionality. It includes all the Standard Edition features, with a number of additional enhancements like Log home and Seasonal evaluations, production and management reports, multi-branch management, an image gallery, mid term endorsement rating, and QuoteCast, our consumer based web quoting service that allows consumers to get online quotes from your brokerage website.

## No Additional Fees

With PowerQuote's many features and services, including toll free technical support, accredited training, software and up-to-the-minute rate updates via our PortalCast internet based subscription service, and our Support Services Portal, you might expect an additional charge. They are ALL included with the cost of PowerQuote. **We DO NOT have ANY additional fees!**
